

BEAULIEU FABRICS IN BELGIUM

One step ahead with PLEVA Sensors
for their coating and heatsetting processes

Dwell time

HeatSet COMPACT

Installed sensors and controller (see figure)

HeatSet COMPACT CP 35: Controller for the sensors

TDS 95: Sensor for heatsetting, coating, vulcanisation

FS 91: Sensor for exhaust humidity

Statements from customer Beaulieu Fabrics

- Up to 25% higher production speed.
- Improved temperature profile of the fabric inside the dryer.
- We have considerable higher reproducibility of the fabric quality with less energy consumption.
- Reduced Exhaust Fan speed, so less gas/electricity consumption.
- Always we can see what's going on with the fabric in the stenter.
